DETAILED ACTION

This office action is in response to remarks filed on 6/5/2006.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Beasom et al. EP 0801426.

3. As to claim 10, Beasom et al. EP 0801426 shows a trench MOSFET comprising: a drain region (Fig. 1, 102) of first conductivity type; a body region (103) over the drain region; a trench (106) extending from a first major surface through the body region; source regions (104) laterally adjacent to the trench at the first major surface; thermal gate oxide (112) on the side walls (107) of the trench; a gate electrode in the trench insulated from the body region by the gate oxide; characterized by a thick oxide plug formed of oxidized doped polysilicon at the base of the trench extending into the drain region (col. 5, lines 1-20).

Allowable Subject Matter

1. Claims 1- 9 are allowable.

2. The following is an examiner's statement of reasons for allowance: There is no prior art available or obvious motivation to combine elements of prior art which teach a

method of thermally oxidizing the device to oxidize the polysilicon plug is oxidized to form an oxide plug at the base of the trench.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
